## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 25, 2010 has been entered.

### ***Response to Amendment***

This Office action is in response to Applicant's communication filed August 25, 2010 in response to the Office action dated May 25, 2010. Claims 1 and 10 have been amended. Claim 4 has been canceled. New claim 11 has been added. Claims 1-3 and 7-11 are pending in this application.

### ***Allowable Subject Matter***

**Claims 1-3 and 7-11** are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose the combination including at least the limitations of:

(**Claim 1**) "...wherein said modifier attaches, to the modified order data, an oldest-order flag which indicates, when enabled, that the access order is the oldest

Art Unit: 2185

regardless of the actual access order and which indicates that the cache entry to be replaced is written to no further, wherein the cache entry to be replaced has, as the order data, a 1-bit order flag that indicates whether the cache entry to be replaced has been accessed since each cache entry had been reset, each cache entry being reset when a 1-bit order flag is enabled for each cache entry, wherein said selector selects the cache entry to be replaced when a cache miss occurs and a cache entry having the oldest-order flag enabled is present, and wherein said selector selects the cache entry to be replaced in accordance with the order data when the 1-bit order flag indicates that the cache entry to be replaced has been accessed since each cache entry had been reset and when the cache entry having the oldest-order flag unenabled is present.”

**(Claim 10)** “..wherein in said modifying, an oldest-order flag is attached to the modified order data which indicates, when enabled, that the access order is the oldest regardless of the actual access order and which indicates that the cache entry to be replaced is written to no further, wherein the cache entry to be replaced has, as the order data, a 1-bit order flag that indicates whether the cache entry to be replaced has been accessed since each cache entry had been reset, each cache entry being reset when a 1-bit order flag is enabled for each cache entry, wherein the cache entry to be replaced is selected when a cache miss occurs and a cache entry having the oldest-order flag is present, and wherein the cache entry to be replaced is selected in accordance with the order data when the 1-bit order flag indicates that the cache entry to be replaced has been accessed since each cache entry had been reset and when the cache entry having the oldest-order flag unenabled is present.”

(**Claim 11**) "...an oldest-orderer that modifies the order data regardless of an actual access order, by attaching, to the order data, an oldest-order flag which indicate, when enabled, that the access order is the oldest regardless of the actual access order and which indicates that the cache entry to be replaced is written to no further...wherein the cache entry to be replaced has, as the order data, a 1-bit order flag that indicates whether the cache entry to be replaced has been accessed since each cache entry had been reset, each cache entry being reset when a 1-bit order flag is enabled for each cache entry wherein said selector selects the cache entry to be replaced when a cache miss occurs and a cache entry having the oldest-order flag enabled is present, and wherein said selector selects the cache entry to be replaced in accordance with the order data when the 1-bit order flag indicates that the cache entry to be replaced has been accessed since each cache entry had been reset and when the cache entry having the oldest-order flag unenabled is present."

As dependent **claims 2, 3, and 7-9** depend from an allowable base claim, they are at least allowable for the same reasons.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
